

Knowledge is Power!

Youth Ambassadors for Peace is a program that encourages the youth, ages 16-24 in our community to finish High School or get your GED. Helping them apply for college or a vocational training in pursuit of a better future. As mentors we assist them with career exploration and the path that is needed to obtain their desired career. This is accomplished through various hands on workshops that are designed to prepare them for work, school and life in general. Once a career is chosen, an internship is arranged in the area of interest to the youth making them a valued member of their community. This then empowers them to make better decisions for themselves and their family.
